MTP 2045

APPENDIX C

Project Scoring

MTP Project Evaluation and Selection

This appendix is intended to provide more information on the project selection process for the 2045 MTP. The project list for the MTP was developed based on where projects are in the project development process.

Where Projects are in the Project Development Process

Projects with Committed Funding (projects in the TIP)- these projects are required to be reflected in the MTP and were added without evaluation steps taken. In the TIP, these are projects that have Right-of-Way Acquisition or Construction funding programmed in the first six years of the 2020-2029 TIP.

Projects Applying for Funding (projects in SPOT)- these projects have already been approved by the MPO Board to go after potential funding in the next round of prioritization so these were not evaluated beyond the previous steps taken by the MPO TCC and Board. To note, these are projects that were approved by the MPO for inclusion in this round of prioritization. NCDOT Divisions may also submit projects within the MPO without the approval of the MPO- these projects were not “automatically” added to the MTP project list.

Long-Term Priorities (projects not in the TIP or SPOT)- these projects were evaluated by MPO staff using data that reflected MTP goals- more details below.

What Projects Were Considered for Long-Term Priorities

Highway projects were collected from the region’s Comprehensive Transportation Plan, the Madison County Transportation Plan, and other locally and regionally adopted plans. Additionally, due to the region’s Comprehensive Transportation Plan being twelve years old, the MTP steering committee added more projects to the list they felt may have been missing from the current Comprehensive Transportation Plan.

Bicycle and Pedestrian projects were collected from locally and regionally adopted bicycle, pedestrian, and greenway plans. These include:

- Henderson County Greenways Master Plan
- Buncombe County Greenways Master Plan
- Haywood County Bicycle Plan
- Asheville Pedestrian Plan
- Asheville Bicycle Plan
- Hendersonville Pedestrian Plan
- Hendersonville Bicycle Plan
- Richland Creek Feasibility Study (Waynesville)
- Black Mountain Bicycle and Pedestrian Plan

- Black Mountain Greenway Plan
- Fletcher Greenway Plan
- Ecusta Trail Study
- Canton Bike/Ped Plan
- Mars Hill Pedestrian Plan
- Laurel Park Bike/Ped Plan
- NC 280 Multi-Use Path Feasibility Study

These projects were collected into a database for scoring by mode: highway and bike/ped.

Long-Term Priority Projects Evaluation

Projects from the database were then broken-up to match the MTP’s financial plan:

Statewide Mobility- projects on Interstate routes or US 23/74 (considered a strategic highway and eligible for Statewide Mobility funds in prioritization)

Regional Impact- projects on US or NC routes

Division Needs- every other roadway project on secondary roads (bike/ped projects were evaluated separately)

Previously, the steering committee was given a poll to put priorities on different goals based on project tiers. Based on the results of that poll, different categories were weighted for each tier:

	Statewide Mobility	Regional Impact	Division Needs
Safety	28%	24%	14%
Congestion	21%	18%	8%
Freight	18%	5%	0%
Environment	18%	13%	22%
Equity	12%	5%	14%
Multimodal	3%	18%	28%
Transit	-	16%	14%

Each category was scored using the following data:

Safety

- NCDOT Crash Rates
- NCDOT Crash Severity

Congestion

- 2018 Volume/Capacity
- 2045 Volume/Capacity
- Average Annual Daily Traffic (AADT)

Freight

- Average Annual Daily Truck Traffic (AADTT)

Environment

- Linking Lands Water Quality Hubs
- Linking Lands Wildlife Hubs
- Linking Lands Biodiversity Hubs
- Historical Properties

Equity

- US Census American Community Survey (Minority Population, Low-Income Population, Low English Proficiency Population, Senior Population)

Multi-Modal

- Estimated Demand based on Walkable Urban Places analysis from the FBRMPO Congestion Management Process

Transit

- Fixed-Route Transit Routes (City of Asheville, Buncombe County, Henderson County, Haywood County)

These weights were applied to each category while prioritizing long-term priorities. Each category was scored based on several metrics (crashes, volume/capacity ratio, bike/ped crashes, historic properties in the vicinity, etc.)

Bike/Ped Project Evaluation

Bike/Ped projects were evaluated as well but with criteria that included: nearby destinations, estimated demand, equity, connectivity to other bike/ped infrastructure, bike/ped crash data, and connections to transit.

Criteria	Weight
Connectivity	35%
Safety	22%
Destinations	16%
Demand	16%
Equity	8%
Transit	3%

The steering committee recommended generally following the project scores made available with few exceptions.

STATEWIDE MOBILITY PROJECTS
