About the Transportation Improvement Program

The French Broad River Metropolitan Planning Organization, established in 1962, serves as the federally-designated Metropolitan Planning Organization (MPO) for the four-county Asheville metropolitan region in western North Carolina. FBRMPO coordinates regional transportation planning and funding for over 414,000 people across 21 municipalities within Buncombe, Haywood, Henderson and Madison counties.

The Transportation Improvement Program (TIP) is a federally-mandated document MPOs are required to produce that reflects the planned investments in a region's transportation infrastructure over at least four years. The TIP was developed to meet all federal requirements in coordination with the North Carolina Department of Transportation (NCDOT), in addition to other local, state and federal transportation planning partners.

The TIP shows all multimodal projects that are using state or federal transportation funds in the MPO Planning Area as well as some projects that are locally funded or have a local government cost-share component. This includes some of the major interstate widenings in the region, other roadway widenings, roadway re-configurations, intersection improvements, public transportation projects, bicycle and pedestrian projects, and aviation projects.

According to federal and state law, TIPs must be "financially constrained." Pages five and six of the TIP demonstrate the fiscal constraint of the TIP by showing how the various federal and state funding sources are distributed through the region. This financial guidance also helps establish highway and transit funding levels that may be reasonably anticipated by the MPO over the TIP period from appropriate federal and state resources.

The TIP shows estimated costs and schedules by project phase. It not only lists specific projects but also documents the schedule and cost for each project phase (preliminary engineering, final design, right-of-way acquisition, and construction). It is important to note that the TIP is a planning document that does not show anticipated cross-sections or other design details of projects. Because the TIP is not a final schedule of project implementation, it may be changed after it is adopted through amendments as outlined in French Broad River MPOs Public Involvement Policy.

While many of the projects shown in the TIP show individual, specific project locations, some do not. Some projects show that there will be resurfacing, safety, or other types of projects within the planning area. For those projects, NCDOT has other websites and resources that show more specifics about the planned resurfacing projects or safety projects. Many of these projects are not expected to result in major changes to the roadway but may include the addition of shoulders, guardrails or other components to help improve some operational elements of the transportation system.

It should also be noted that many projects listed as "roadway" projects may include bicycle and pedestrian components as those projects are developed, based on the NCDOT Complete Streets Policy. For more information on bicycle and pedestrian improvements that may be included as part of some of the projects listed in the TIP, please contact MPO or NCDOT staff.

In order to maintain consistency between the TIP and STIP, as federally mandated, a set of TIP Modification and Amendment Policies have been developed to govern the TIP and its associated projects. As Modifications and Amendments are made to the TIP, they will be attached to the TIP document in the Appendices and the Date Modified on the cover page will be updated to reflect the changes.

Development of the TIP

The development of the TIP is structured through North Carolina's Strategic Transportation Investments Act (STI), passed by Governor Pat McCrory and the NC Legislature in 2013. STI mandates a performance-driven process that is transparent and data-driven. The prioritization process that results in the projects that make up the TIP is a relatively complex process that involves choosing transportation projects from long-range plans, data-driven assessments and scoring by the NCDOT Prioritization Office, and the application of local-input points by MPOs, RPOs, and NCDOT Divisions. More information on the prioritization process can be found at <http://www.ncdot.gov/sti>.

The development of the 2024-2033 TIP took place between 2021 and 2023 with coordination between NCDOT, NCDOT Divisions, the French Broad River MPO, and the local governments throughout the MPO region. Due to rising costs for projects funded in the previously adopted 2020-2029 TIP, little to no funding was projected to be available for new projects in the 2024-2033 TIP. Therefore, the decision was made to halt the prioritization cycle (p 6.0) and develop the 2024-2033 TIP using existing projects from the previously adopted 2020-2029 TIP. Throughout the process of re-prioritizing projects, MPO staff solicited input from the public either through advertisements soliciting general comments or surveys distributed throughout the region as outlined in French Broad River MPOs Public Involvement Policy.

The 2024-2033 TIP is available virtually, along with an online TIP tool that can be found on the French Broad River MPO website (<https://frenchbroadrivermpo.org/2024-2033-transportation-improvement-program-tip/>) . Using this TIP tool, you can explore each project's information, funding details, and more in depth.

The NCDOT has demonstrated fiscal constraint on the 2024 - 2033 STIP adopted 6/6/2023. The French Broad River MPO TIP is a subset of the STIP and by extension therefore demonstrates fiscal constraint.

The following two pages reflect the fiscal constraint summaries for highway and non-highway programs. The fiscal constraint and funding summary provides a summation of the various federal, state, and local funds to be used for the first four years of the TIP (2024 - 2027)

Appendix A: Performance Measures

The French Broad River Metropolitan Planning Organization (MFBRMPO) has established performance management targets for highway safety (established in the Strategic Highway Safety Plan (SHSP)), transit tier 2 providers that choose to participate in NCDOT's Group Transit Asset Management (TAM) Plan, and performance management targets for infrastructure condition, congestion, system reliability, emissions, and freight movement. The FBRMPO anticipates meeting their identified targets with the State funded Highway Maintenance Improvement Program (HMIP) and the mix of projects included in the STIP aided by the Strategic Transportation Investments Prioritization and Programming process. The HMIP is a State funded program of projects that are programmed outside of the STIP. The FBRMPO collects data and other information at regular time intervals from the transit agencies relative to measure and assess progress toward meeting performance targets.

In North Carolina, pavement and bridge performance is primarily impacted through state funded programs that are managed outside the STIP. The Department's HMIP, identifies planned maintenance activities for a five-year time period, which include pavement, bridge, and other general maintenance projects across our entire roadway network. The amount of funding provided through these state funded programs is roughly equivalent to the amount of state and federal funding programmed in the STIP over the same period. In relation to NHM specific routes, the STIP does include some specific federal funding for interstate pavement and bridge maintenance through our own internal interstate maintenance program. Federal funding for bridges included in the STIP is applied primarily to non-NHS bridges. While the STIP can have an impact to the condition of our NHS pavements and bridges, specifically on the interstate system, the majority of the funding impacting the condition of our pavements and bridges is managed outside the STIP.

Public transit projects in the STIP align with the transit safety planning and target setting process undertaken by the transit agencies and MPOs. While the North Carolina DOT aided with the development of a template for the initial Public Transportation Agency Safety Plans (PTASPs), each large urban transit provider is responsible for implementing its PTASP, which includes transit safety targets. Investments are made in alignment with PTASPs with the intent of keeping the state's public transit operations, vehicles, and facilities safe and meeting transit safety targets. State and federal funding sources that can be used by transit agencies for operations, vehicles, and facility improvements are outlined in the Public Transportation Project Funding section of the NCDOT 2024-2033 Current STIP. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

The French Broad River MPO adopted the following Safety Performance Targets prior to the adoption of the 2024-2033 STIP:

Year	Fatalities (5 Year Average)	Fatality Rate (5 Year Average)	Serious Injuries (5 Year Average)	Serious Injury Rate (5 Year Average)	Non-motorized Fatalities and Serious Injuries (5 Year Average)
2008 - 2012	44.0	1.000	113.4	2.578	16.4
2009 - 2013	45.0	1.012	101.6	2.289	15.6
2010 - 2014	46.8	1.042	89.6	2.003	15.6
2011 - 2015	46.8	1.030	81.8	1.809	15.6
2012 - 2016	46.0	0.993	74.0	1.599	16.0
2013 - 2017	50.0	1.052	84.4	1.751	15.2
2014 - 2018	52.2	1.076	102.0	2.067	17.2
2015 - 2019	51.0	1.029	116.8	2.327	17.6
2016 - 2020	49.4	0.999	128.4	2.593	18.6
2017 - 2021	50.2	1.006	136.8	2.743	19.2
2023 Target*	43.7	0.876	105.6	2.096	15.1

Pavement Condition:

Performance Measure	2023 Target	2025 Target
Percent of Interstate Pavement in Good Condition	60%	62%
Percent of Interstate Pavement in Poor Condition	1.8%	1.5%
Percent of Non-Interstate NHS Pavement in Good Condition	30%	31%
Percent of Non-Interstate NHS Pavement in Poor Condition	3.5%	3.0%

Bridge Condition:

Performance Measure	2023 Target	2025 Target
Percent of NHS Bridges by Deck Area in Good Condition	38%	36%
Percent of NHS Bridges by Deck Area in Poor Condition	5%	5%

Travel Time Reliability:

Performance Measure	2023 Target	2025 Target
Percent of Person-Miles Traveled on the Interstate that are Reliable	75%	75%
Percent of Person-Miles Traveled on the Non-Interstate NHS that are Reliable	70%	70%
Truck Travel Time Reliability Index	1.70	1.70
